

## Team members wanted for support with planning, organisation and supervision of the lecture series SciSAI in winter semester 23/24

SciSAI stands for *Scientists in Society, Academia and Industry - Barriers and Opportunities*. We, seven (doctoral) students are organising this lecture series since 2020 because we believe that the social and societal aspects, which also have an impact on the natural sciences and engineering, are clearly neglected in their curricula. We are responsible for the exact definition of the topics, the selection of the speakers and all aspects of the organisation; one of them being the decision of how many of the sessions take place in German and how many in English. Currently, all members of the planning team are equally involved in all processes and it is important to us to make decisions by consensus.

If you want to participate, you are free to decide to what extent and in which areas you want to get involved. You are welcome to take on specific tasks or to contribute to the conceptual design of the events.

### What are the general tasks?

- Selecting topics and researching suitable guests
- Inquiring about speakers and looking after them before and after the lectures
- Raising funds
- Promoting the events on various (social media) channels
- Designing and updating the Moodle course and website
- Recording the lectures, creating subtitles via Panopto and taking minutes of discussions
- Moderation of the events

### What should you bring with you?

- Interest in the interaction of natural sciences and society
- A desire to work together in a team and to contribute constructively
- Openness to becoming aware of privileges, discrimination and power structures

### What can we offer?

- Insights into the background of a course and the option to help shape processes yourself
- The chance to network with experts from different sectors
- The opportunity to contribute to more equal opportunities at the university and beyond

### Maybe interested?

If you want to get a better idea of what this is all about before you make your decision, you are welcome to take a look at our [Website](#) and last semester's [Moodle-Course](#). There you will find more detailed information on the program and speakers, as well as numerous recordings of previous lectures.

Even then, of course, you don't have to make a final decision. You are welcome to contact us by email and/or come to one of our informal **get-to-know-you meetings** in May:

- 02.05.23, 17:30 - 18:30, via [Zoom](#) (Meeting-ID: 619 0767 7804, Passcode: 432228)
- 04.05.23, 17:30 - 18:30, at beer garden Lichtwiese (or in case of rain at L2|04 F2)

If none of the dates suits you or if you feel more comfortable talking in a smaller group, please feel free to contact us by email.

We look forward to meeting you!

Han, Julie-Isabelle, Kilian, Ju, Miriam, Ricarda and Lenia
